JEREZ VINEGAR

Jerez vinegar, which inherits the qualities of the Sherry from which it is made, has become a vital culinary ingredient and one of our country's most internationally recognized treasures.

Our Vinegar plant was born when Moisés Monge was an agent dealing in wines, grapes, grape juices, olorosos, and even barrels with numerous Sherry district wineries and cooperatives in the early 70's.

Having so many contacts it was easy for him to agree prices and facilitate transactions between them. The problem came when a winery ordered 12500 litres, (25 barrels), of vinegar. It was difficult to find 5000 litres, (10 barrels), of vinegar from amongst all the local vinegar makers, let alone 12500, so he had to find some from other producers from outside the district, such as Torrijos (Toledo), Tudela (Navarra). The fact was that here in the Sherry district if a winery had any vinegar it was a blot on their image so the vinegar they had was well hidden and was reserved for the use of the owners and their friends. So we became the first Bodega in Sanlúcar de Bda. to exclusively produce Vinegar. Initially we only sold our products in the Sherry district but later we extended our sales abroad. These days we sell our Sherry vinegars in:

France, (45% of their vinegar imports), Germany, Sweden, USA, Canada and China.

Consequently, VIDESAN SL, with 40 years of production experience, is the 1st company exclusively producing Sherry vinegar and is backed by the "Denominacion de Origen" quality certificate, No-15 9001-2000.
